

Knowledge Reference

SASB KB: EN / FR / KO / JA / TH / ZH

Category, unit, and
“what counts” rules

Data Source

Train / Dev / Test
CSV and JSON

SASB metric
metadata

Source ESG
PDFs

*full reports and
single-page rows*

Preprocessing

Clean and
normalize

Extract page text
and snippets

Render page image
(96 DPI, low detail)

Map report pages
to metric rows

Retrieval and Context

TF-IDF + character
TF-IDF

MiniLM / BGE-M3
dense retrieval

Sparse + ColBERT
multi-vector lane

RRF fusion; Top-k
label-balanced examples

Prompting Strategy

Few-shot examples +
metric metadata

Structured JSON
output schema

Task 1: Full-Report Match

BGE-M3 dense+sparse+
ColBERT candidate fusion

VLM reranking:
textttgpt-5.4-nano

Relevant-page candidates
and evidence pages

Task 2: Page Verification

Gemini 2.5 Pro / GLM-5.2

GPT-5.4-mini + page image
and extracted text

MiniLM + LR baseline;
yes / partial / no

Evaluation and Output

Task 1: Hit@k, MRR,
Near@1, candidate recall

Task 2: Micro / Macro F1
and per-language scores

Evidence, CSV,
JSONL, and logs

*reproducible metrics
and error analysis*
